SPHINX 3D

FEATURING

TRUE 3D™

Unique Packaging
With iconic illuminated Sphinx head and themed side panels, Sphinx 3D's unique stand-out design ensures a commanding floor presence.

AXXIS™ Cabinet
Designed to maximize player comfort, create a sense of personal space, and immerse the player in the game, it offers a host of player-centric features such as an advanced button panel, full-scale illumination and premium audio.

39" Portrait LCD
Eye-catching top screen with full HD resolution is highly visible across any casino floor and easily seen by the player.

TRUE 3D™ LCD Display
23" widescreen, glasses-free 3D display provides brilliant 3D image quality, offering high resolution, color fidelity, brightness, and true 3D depth without the need to wear special glasses.

Premium Audio
Specially designed audio system will make the game come alive while helping to further immerse the player in the unique True 3D experience.

Digital Button Panel
Customizable interface enables new game dynamics. Seamlessly integrated into the cabinet design and featuring a large high-resolution touch-capable display, two color OLED Play buttons, and additional side mounted mechanical buttons which ensure a comfortable and dynamic play experience.

Multimedia Chair
A new benchmark in ergonomic design and comfort with player-focused sound and rumble. Integrated sliding mechanism to ensure easy access and player-adjustable for supreme overall comfort.

SPHINX 3D

WITH

TRUE 3D™

INTRODUCING

AXXIS™

This True 3D™ experience is certain to impress with its unique award-winning and patented autostereoscopic technology, using integrated eye-tracking to make images jump off the screen or stretch into infinity in high resolution.

The integrated eye-tracking system detects the player's position and continuously adjusts the image according to their position. The image is processed and displayed so that the ideal 3D picture self-matches the player's precise line of sight, allowing freedom of movement in all directions – all without the need for special glasses.

Game play is radically transformed by this autostereoscopic technology. When used as an input to game events, eye-tracking opens up a new world of possibilities: players can explore the on-screen vistas, change viewing angles without disrupting the 3D experience, and be amazed by wilds that stack atop one another so they seem to jump out at them.

The brilliant 3D image quality offers high-resolution, color fidelity, brightness, and true 3D depth without the need to wear special glasses, making it a first on the casino floor. This 3D experience uses a glasses-free 3D display (True 3D) designed exclusively for GTECH for the gaming industry by SeeFront.

What our players are saying:

“IT'S AMAZING that they can do the 3D without the 3D glasses.”
“...feels as if you are THERE!”
“People will LINE UP for this machine.”

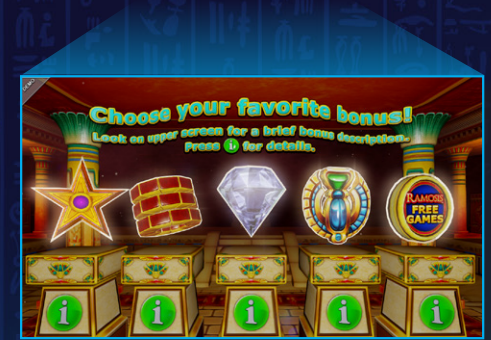

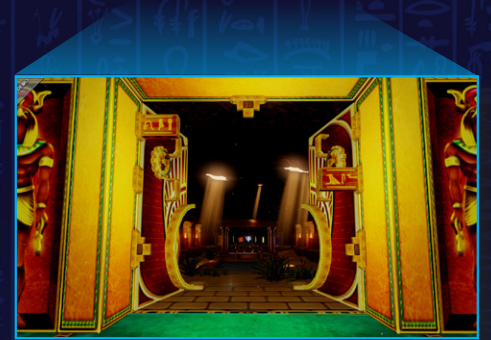

Journey through time to the land of pharaohs, where golden treasure abounds...

Sphinx 3D™ is the first title in our new True3D™ product line, utilizing patented, award-winning 3D display technology exclusively designed for GTECH for the gaming industry.

Sphinx 3D, a five-reel, 30 line game features an action-packed base game and a total of seven bonuses: two in the base game, and five that are part of the Sphinx Bonus selection.

Three Sphinx symbols in the base game trigger the Sphinx Bonus selection: the higher the bet, the bigger the selection of bonuses to choose from in this unique take on buy-a-feature. All bonuses leverage the 3D technology to enhance the gaming experience, and game play is radically transformed by using an integrated player eye-tracking system that allows players to move their head to change viewing angles and explore different bonus environments.

Three Sphinx symbols on reels two, three, and four trigger the Sphinx Bonus. Players travel up to the Sphinx pyramid in this Bonus Selection Segment in an immersive real-time rendered 3D scene.

DIAMONDS CHAMBER BONUS
Players pick from a selection of diamonds to reveal credits, multipliers, or extra rounds during four rounds of game play.

STARS PROGRESSIVE BONUS
Players choose stars that move to the upper screen to be placed next to the five progressive jackpot levels. Five stars next to the same level award the corresponding jackpot amount, and at least one jackpot is guaranteed. The progressive can be standalone or linked with Game Boss.

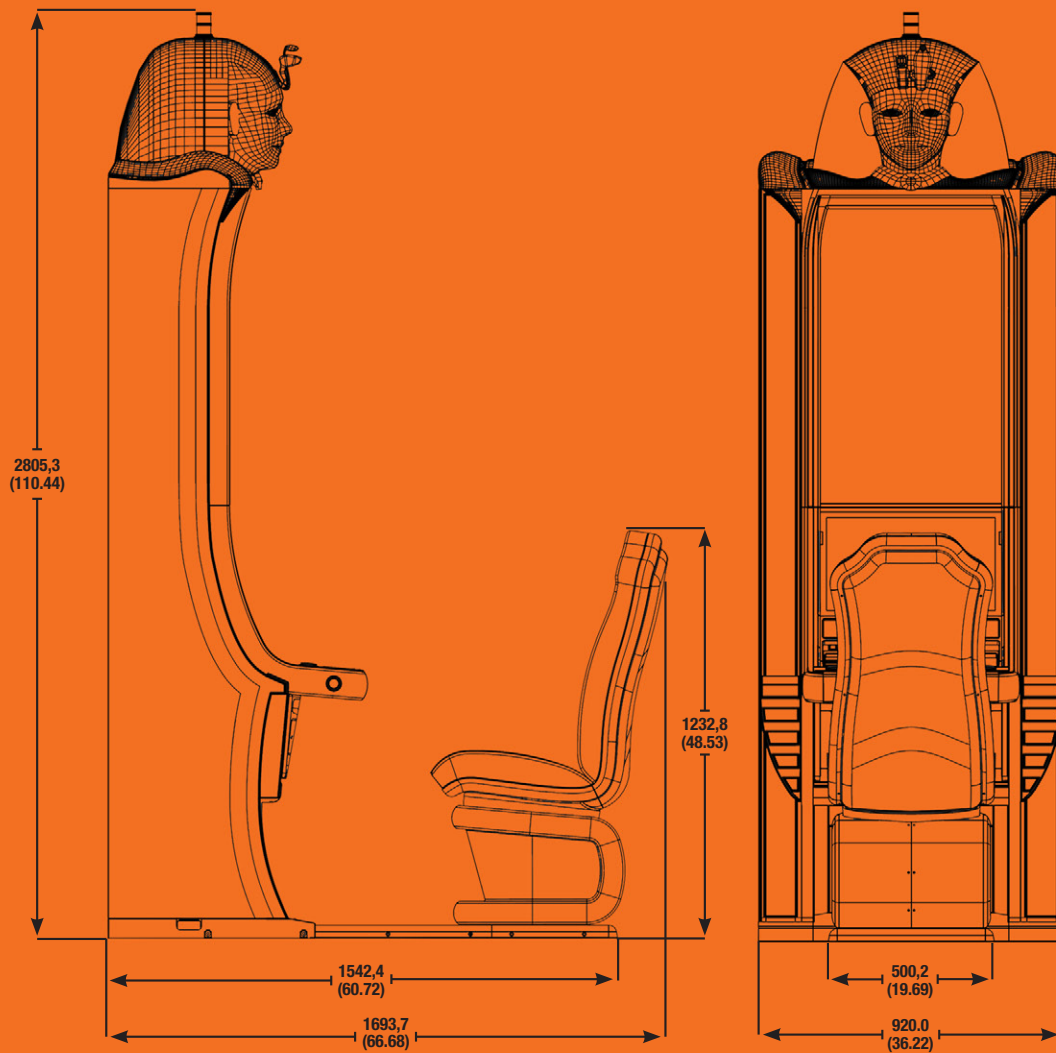

ANCIENT WHEEL BONUS
The player can choose up to three times from three magic wheels representing different volatilities. Spinning the wheels will start the payoff of a credit amount that is shown on the wheels. Players can look around and behind the wheel to peek at values before making a selection.

WILD SCARAB BONUS
Players find and activate long-lost scarab reels in this bonus, which features 10 free spins and stacked wilds on the z-axis. For added excitement, scarabs that don't pay build up stacks until they pay.

RAMOSIS™ FREE GAME BONUS
This free games bonus is played on special bonus reels and awards 20 free games with a 2x multiplier.
